Mergers And Acquisitions (University Casebook Series)

Synopsis

This casebook is designed to introduce law students to transactional lawyering and to encourage stimulating student dialogues. At the same time it includes enough material from finance and economics literature to give students an understanding of how the market for corporate control operates. The casebook contains examples of documentation, as well as leading cases in each area. It is divided into four parts, including: (1) the source of gains in business combinations; (2) duties and risks of sellers; (3) buyers' risks in acquisitions; and (4) takeover contests.

Customer Reviews

I've never seen a book with even a tenth of the amount of typos that this book has--there are typos on virtually every page. One opinion, *Gantler v. Stephens*, is completely garbled and has multiple pages printed twice. I have no idea how this edition was ever approved to go to press.

Editor's text is very poorly written and almost stream-of-consciousness, with little transition and jumping back and forth between points.

This book is really awful. It's written like a mess and includes very little practical information.
