## Customer Reviews

This is a beautifully presented book, with gorgeous photo images. The recipes are easy to use, the ingredients mostly easy to find and natural. I would have appreciated just a little more information on color blending, but I plan to do my own experimenting anyway. Excellent job. Highly recommended.

Very limited informationLots of pretty pictures but all the formulas use the same basic ingredients which include talcum,wich some people do not use and Constarch and magnesium stearate which I am allergic to. There are no alternatives given and the same ingredients throughout the book.If you can use these ing. you might like this book.SShe uses potato starch, what?It is all very simplistic and realy short of information.There are no preservatives used in some cream and lotion formulas that

contain water. She does use prabens and germaben II (preservatives) for other items. Some of the oil based formulas do not have an antioxidant added and therefore have a shorter shelf life. Some formulas do not need antioxidants, but I like to add them to help prevent rancidity. There are a lot of color ideas, but with measurments given as "a few grains", it is hard to achieve consistency. However with so few books out there on how to make mmu, this one might work for you if you are new to mmu and are ok with the ing. she uses.

This book is full of colorful pictures, but I'm afraid short on the information I hoped to find within. If you are just begining to make your own cosmetics, this MIGHT have information you can use; however, for the person hoping to find new information concerning formulas, etc., no such luck.

Nice book with nice pictures but I wAs expecting a book where I could make my own products possibly for sell.
