How to Analyze People is a well written book about perception and how to see the meaning behind what people convey. Sometimes people say one thing but their body language tells us something different. I used to be indifferent of all this until I got the chance to download and read this book. Now I know better and I am more conscious of what I see as compared to what I hear!

There are many different methods of analysis of people. The quickest way of analysis is the appearance. Knowing some of the nuances, everyone will be able to determine the internal state of the monitored person based on its appearance: the preferred color selection and wearing of clothes and shoes, jewelry and accessories. A very interesting book.
