Customer Reviews

I bought this book on Ethical Will writing expecting to be given various ideas about writing and Ethical Will. I expected the ideas to be general in nature and to have enough variety that they would appeal to anyone. Instead I found that the author had indeed given various ideas about Ethical Will Writing as he suggests you might include your values, the things you have learned in life and perhaps some family history that you might want to pass on. I found that the "various ideas" were very limited in scope; however that was not the part of this pamphlet that really bothered me. It seems that the author had taken perhaps 45 minutes and jotted this information down for something that he might be presenting in a talk or lecture. But he would have to be speaking to a very limited audience with very narrow views of the world. He seemed really to present the things that HE might think about putting in his Will. Make an outline, get a blank piece of paper and write he says. Well,

any 5th grader could have told me that. I thought he would have some extensive, insightful, "deep" things to share. No, he did not. Get your parper, make a list and tell people how you feel. Ok. That task is done and on to the next one...so to speak.I found NO information that I could not come up with in two or three minutes myself. I thought it was a travesty that someone could get this little phamphet published and make money from it. "They" say we are a dumbed down nation. Must be if this kind of thing is publishable. It went back,I am going to go back through the books...the real books...not the phamphlets...written on Ethical Will preparation and find one that has some new, "deep" and insightful information. Assuming it is there, I shall purchase it instead.
