After you read the title, you expect exactly what the book delivers: excelent visual stimulation and the best magazine websites briefly analysed. Salon, Feed, Rolling Stone and all the best are there, both Internet-only mags and the printed ones with a cool version on the Web. Essential. It's impossible, even for the best and most experienced webdesign professional, do not like it. It's not
the "complete guide" or something, but the 40/50 websites there are really THE ONES. A little over-priced, true, but you can consider yourself a lucky guy if you don't have the chance to put your hands on it: this book is one of those that once touched, it is immediately bought.

In all honesty I bought this book mainly because, much to my surprise, I found that my work is actually included...for Ms. Gill to stumble across my site, she really must’ve scoured the web. And you can see that from the rich variety of other examples included. Bravall just wish she sent me a copy for free! ;)
