Beating Obamacare is an 'everyman's' guide to understanding what major changes to expect under the new health law. McCaughey is the nation's expert on the topic and has committed her career to reading lengthy legislation and informing the public on what's actually in bills pushed through Congress. We all know Washington politicians rarely read the bills they vote on, as long as a hat is tipped to their special projects. The only way to change the disgraceful way Washington does business is to get informed about the true contents of laws. DC politicians have underestimated the power and intelligence of the everyman. We aren't going to continue taking political talking points at face value. A renowned academic and former Lt. Governor of New York State, Betsy McCaughey has consistently pushed back against 'business as usual' in local, state, and national politics. She has again taken a stand on behalf of 'we the people' and written an informative, concise, and forward-looking guide on big changes under this new law. The book is easily broken down in sections based on major groups and how they are affected. Entrepreneurs, doctors, the young and elderly, uninsured, critically ill... McCaughey covers it all. The book includes timelines and additional resources on how to find more information. I was shocked to learn that as many as one-third of individuals may lose on-the-job health coverage in 2014 under Obamacare. Medicare funding is raided under this law to fund an unprecedented expansion of Medicaid, just as baby boomers turn 65. The Sec. Health and Human Services is granted incredibly BROAD powers over how doctors treat patients.
