Lottery Winning Systems: Turns A Game Of Luck Into A Game Of Skill!

Synopsis

Sixty Second Lottery Formulas! Gail Howards Lottery Winning Systems turns a game of luck into a game of skill. It takes less than a minute to apply any one of the 12 easy-to-use 60-second formulas in this book. Choose more than six lotto numbers and place them in the corresponding lettered boxes and your numbers are magically (mathematically) combined into the correct combinations to give a specific win guarantee. As with all of Gail Howard's wheeling systems, there is no easier way to combine your lotto numbers. So simple a child can do it. Fast and easy to use as A-B-C! Included is a secret weapon that won six jackpots worth a combined total of \$20 million dollars...also a scientific system that won a \$9.48 million dollar California Lotto jackpot. These systems can be used for any pick-6 lotto game in the world. --Smart Luck Publishers

Customer Reviews

Mega condensed versions of Gail Howard's winning strategies built into this powerhouse tome. 12 60 second formulas with baby step instructions. Really, really easy and a good entry into the lotto/lottery world. 3rd book by Howard I rapidly devoured. Neighbors, friends and significant others know enough to back away from me when I am reading any Gail Howard book. Hey, even the dog, saw that he was not going to be able to sit in my lap when I am so intent(smart puppy!). I am reading, taking notes, thinking out loud, plotting my winnings, not eating(that is really, really good

and an extra bonus)and very buoyed by the possibilities. These are possibilities, not promises. You have to pay attention to all of it and follow her advice. Twelve outstanding short exercises and most of them worked for me right away. If this was a documentary, this book would be the sound bite/trailer that convinces you to plunk down your money and enter the theater. Howard is intelligent-it radiates from the page. My friends won big sums using her strategies and I won immediately after reading her. Call this the "better than Reader's Digest version of lottery winnings." Great gift for anyone. Cannot go wrong with these books, I read three others, am ordering the software and really going to concentrate on her versus the other authors I read such as Bluskov who did not do a thing for me. Gail Howard is the winner out of all of these authors.

This book was small and thin even for a paperback. It contains just enough of a teaser of information to interest you further. To really get an idea of how this works, you have to then purchase at least one of her other more expensive books, and her charting system; unless you want to go for her high priced software. No doubt about it, Gail Howard is getting rich selling all her books. Does any of this work? I don't know, but she is rather famous for her systems. It gives you a more informed idea as to how the lotteries work; but random is still random to me.

A book for the understanding of lottery systems, but many of the strategies are outdated. It is fine for the novice reader, but don't put all your eggs in one basket! This book cannot guarantee anyone even a small amount of success, since the material is outdated, and many of the lottery systems out there have changed.

What I love about Lottery Winning Systemsthis is that you can jump right in and use it. I have given this a present so many times and people go crazy over it. Once again, easy to understand and things you can do immediately without wading through a bigger book.

You can bad-mouth this all you want, but I have won more than \$8,000 using Gail Howard's wheels with my own system for ordering the numbers with input from Gail's Lottery Master Guide. She does not address Pick 3 and Pick 4, on which I am now concentrating. Her stuff was a revelation to me in September 2009, after I had spent three months of programming ideas that I had. If you have all these new techniques or ideas that are better, use them and win. If someone wants to be fully educated, they should read this stuff, along with many more books. I write lottery software and write books about how to play lottery games, and have won some bucks in the process.

Wonderful little book describing Wheeling Systems. Also has the famous 608 Balanced Wheel used by six jackpot winners. Nice to have this little book for my reference library. Thank you Gail Howard for revising your books. As with all lotteries you have to find your own way of selecting numbers. From my own experience I have found each lottery is different. Some focus on missing numbers. Some mix frequent numbers with missing numbers. When looking for number patterns in Large games look for patterns with same number group in ball 1 and ball 5. When you take the time to actually READ previous draws you are training yourself to see the patterns. One day you will print out six months of previous draws and your eyes will automatically pick up on the consistency of number patterns. And yes in the smaller games 49 numbers and below there are numbers that consistently come up together. Also look for last digits and you will see that not all last digits are played. If there are nine last digits (1-2-3-4-5-6-7-8-9-0) it's real obvious that most is six in any game so what last digits come in most? If you want to know about wheels this book will explain them to you.

Book was not what I expected. The book needs upgrading. The winners mentioned were winners years ago, during 1980s, 90s. The book did not interest me. I am an everyday lottery player and it did not hold my interest.

Book is virtually a copy from her other published works. It's not worth buying. Her other products are, though. Disappointed to say the least. There are some pick six wheels here, but yeah not much of anything else.
